

# A modern, mobile collaboration solution for sales professionals

Focus on building pipeline, engaging customers, and closing sales with easy, secure file sharing and collaboration

With Syncplicity, you can access everything you need on the road with just a tablet or smartphone. That includes your most up-to-date presentations, price sheets, contracts, and more. Edit a Microsoft Office document, and send materials and proposals to customers and get notified when they read them.

Forget your laptop, but have your tablet? No worries. You can access all your files and present from your tablet.

Syncplicity's intuitive design is simple for the least tech-savvy user, yet our enterprise-grade security means your data remains safe and in compliance with security policies and regulations.

## Streamline sales engagement with anytime, anywhere access

Blessed by IT and loved by users, you can start using Syncplicity right now.

No more VPN!  
Automatically sync and share files without size limits

Know what your prospects know – get notified when they view documents

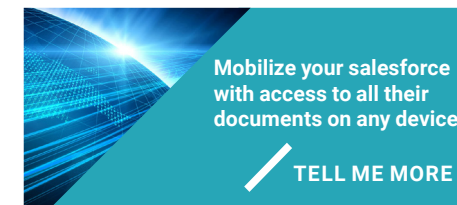

Keep your team in sync with group folders

Move deals forward on the fly by editing and sending documents directly from your mobile device

View, edit, and share any document, anytime, anywhere, from any device
